

Video inspection systems

HDMag 240 flex video inspection system

Compact, portable electronic inspection device. With unique Colour-Boost-Contrast for superior contrast and brilliant colours – in HD quality. 3-axis pivotable camera offers a comprehensive view of the test object. Thanks to the ample workspace under the camera, the device is suitable for versatile applications. Integrated carrying handle for quick and easy transportation.

- High definition auto-focus camera with manual focus override
- 1.7x to 96x magnification
- Inspection: camera rotates 330° enabling close/intermediate/distance viewing
- Individual magnification, colour and position settings are saved for each view
- Multiple comfort features such as freeze frame, masks, reading line
- 33 colour modes: true full colour, high-contrast full colour (Colour-Boost-Contrast), black on white, white on black, yellow on blue, yellow on black and 27 additional colour modes
- 41 cm workspace clearance under the camera
- Remote control with large colour-coded buttons facilitates intuitive handling
- Focus lock
- Find feature
- Individually adjustable monitor tilt supports ergonomic head posture
- Flexible: camera arm folds away behind the monitor for quick transportation
