## PEAK POCKET MICROSCOPE

The majority of conventional fountain-pen type simplified microscopes lack optical precision and because of their dark images are not practical. Our company has continued research and development for a small size, high performance and durable microscope that could be easily carried in the pocket for use at all times. We have finally developed the Peak Pocket Microscope 25X, 50X, 75X and 100X which fully satisfy the above requirements.

The outstanding features of this Pocket Microscope are: very sharp resolving power throughout its field of view, unbelievably bright and light in weight.

To focus the microscope, hold it so that the notch at the tip of the acryl cylinder of the microscope will face towards you, place the center of the object lens right above the specimen and, while tilting the cylinder forward and backward with your eye on the eye-piece lens, fix the cylinder and observe at an angle which can give the sharpest image.

In order to raise the precision of their products, various industries must concentrate on studying the world of micro. Peak Pocket Microscope has completely changed the concept of pocket microscopes which were heretofore more or less regarded as toys. It is a practical and convenient pocket microscope for the technocrat.

Item No.	Magnification	Field of view	Size	Net weight
No. 2001-25	25×	3.30 mm $\phi$	12.4 $\phi$ ×127 mm	12 gm.
No. 2001-50	50×	2.00 mm $\phi$	12.4 $\phi$ ×127 mm	12 gm.
No. 2001-75	75×	1.09 mm $\phi$	12.4 $\phi$ ×127 mm	13 gm.
No. 2001-100	100×	0.84 mm $\phi$	12.4 $\phi$ ×127 mm	16 gm.
